Manchester hosts September Meeting

John and Donna Weibel hosted the September meeting of the Monticello Chapter API. There was a lot of activity at the

Manchester Airport that night so everyone was treated to tire kicking and the sound of engines.

Bern Heimos speaks about “Flying Low and Slow”.

We were lucky enough to have Bern Heimos in the area at the time of our meeting and he was kind enough to speak to us on flying low and slow across America. Bern is from Laguna Niguel, CA and has flown across America several times, has produced a film about his flights and has written articles for major aviation magazines.

This year we were treated to his production, “Always on Final”, his power point program, “How you know when you are low and slow, and his film “Journey Home” starring his Piper Cub and Bern flying to Lock Haven, PA (birth place of the Cub) for the annual reunion.

This year Bern’s travels took him from California to the Statue of Liberty and back home via Blakesburg, IA Fly In and Brodhead, WI Fly In .

Pilot Thoughts

Before each flight, make sure that your bladder is empty and your fuel tanks are full.

He who demands everything that his aircraft can give him is a pilot; he who demands one iota more is a fool.

There are certain aircraft sounds that can only be heard at night.
